

Excellence in Stainless Steel

Raajratna
WIREROPE PVT. LTD.

Manufacturer-Exporter of Stainless Steel Wire Ropes & Strands

ABOUT US

Raajratna Wire rope belongs to the Raajratna Group, a renowned conglomerate in the world of stainless steel products such as wires, tubes, fasteners, electrodes etc. We are engaged in the manufacture and export of stainless steel wire ropes and strands for various applications like automotive control cables, architecture, fishing ropes, safety equipment etc.

We are the 1st company in India to manufacture electropolished wire ropes (EP quality), offering best-in-class surface treatment along with smooth and shiny finish.

We produce superior quality wire ropes and strands made from world-class quality wire supplied by our group company, **Raajratna Metal Industries Limited**. Backed by the expertise and quality of our parent company, we strive to achieve excellence in the field of wire ropes.

We operate in a culture where there is no compromise on the quality of our product, and customer satisfaction is of prime importance. Together, we have a vision of stranding the world together.

CERTIFICATIONS

- **IATF 16949**: We are currently in process of obtaining Letter of Conformance
- **ISO 9001:2015 Certified**

INFRASTRUCTURE

- Standalone unit with an annual production capacity of 1200 MT, in first phase
- Several high-end Korean stranding machines that produce various constructions across a range of sizes
- A state-of-the-art electro-polishing facility procured from leading surface treatment equipment manufacturer in Europe

CONSTRUCTION RANGE

1 x 7	1 x 19	1 x 37	7 x 7	7 x 19	19 x 7
DIAMETER 0.30 - 6.90 MM	DIAMETER 0.70 - 8.00 MM	DIAMETER 2.80 - 6.40 MM	DIAMETER 0.90 - 10.00 MM	DIAMETER 2.10 - 12.00 MM	DIAMETER 2.10 - 6.40 MM

ELECTRO-POLISHED WIRE ROPES

We are India's first company with a dedicated line for electro-polishing wire ropes. We offer best-in-class surface treatment and finish using our proprietary process and advanced technology.

What is electro-polishing?

Electropolishing is a surface treatment process that removes a thin layer of material from a metal part, typically stainless steel or similar alloy, using electricity and chemicals. The process leaves a shiny, smooth and clean surface finish.

There are various benefits of using electro-polished wire ropes such as:

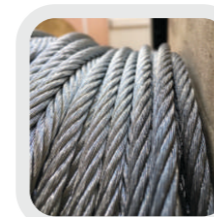

Standard

Electro-Polished

- Uniform and smooth surface
- Improved shine and lustre
- Better aesthetic appearance
- Improved corrosion resistance
- Improved durability and life-cycle

APPLICATIONS

General Purpose

Automotive Control Cables

Architecture

Aircraft Cable

Light / Medium Duty Slings

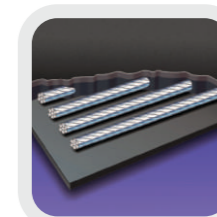

Safety Equipment

Fishery Rope

Guy Strand

Conveyor Belt Cord

High Mast Lighting System

PACKAGING

Customers can specify their own packaging standards, as per their requirement. Alternatively, we provide various packaging options in wooden and plastic spools along with standard packaging like corrugated boxes and wooden pallets.

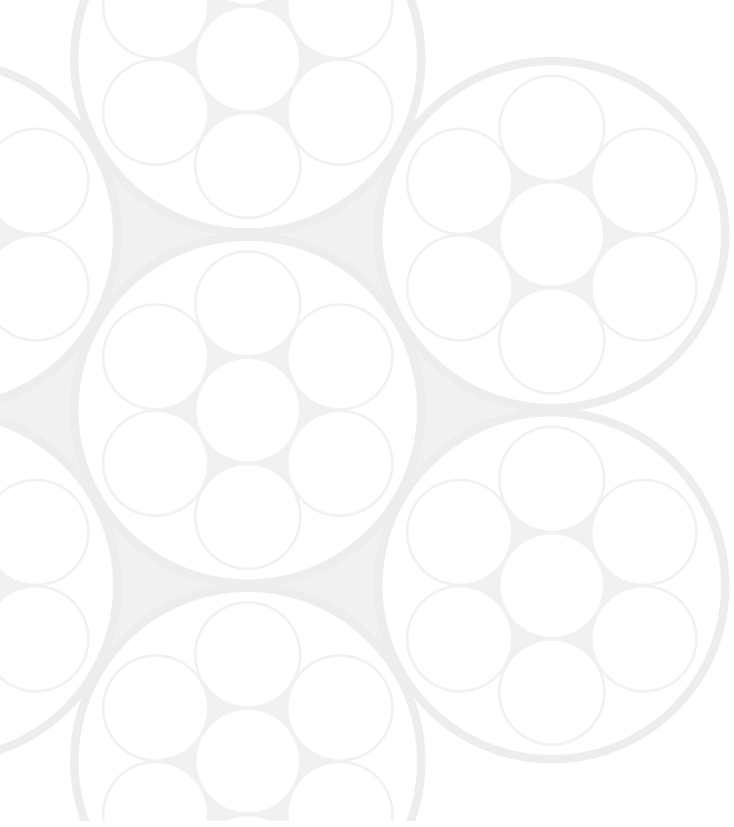

Wooden Spools

Plastic Spools

Corrugated Boxes + Pallet
